## **Publishing Your Research Results -**

### **Tips from Taylor & Francis Publishers**

Below are links to various pages in the Taylor & Francis (T&F) Author Services arena - <https://authorservices.taylorandfrancis.com/>. That link provides a flavor of the types of handouts the publishers have, the information they are sharing, and answers to common questions.

- T&F has a pamphlet with tips for navigating the publishing process - <https://authorservices.taylorandfrancis.com/understanding-the-publishing-process-workshops-and-events/>
- Another handout looks at understanding peer review - <https://authorservices.taylorandfrancis.com/wp-content/uploads/2015/08/Understanding-peer-review.png>. T&F's goal is to educate early career researchers about the value of peer review and how and why they should participate. See <https://authorservices.taylorandfrancis.com/what-to-expect-during-peer-review/>.
- In an increasingly Open world, researchers have more and more questions about how Open Science works and how it affects them as authors and readers. This handout on Data Sharing Policies helps authors to understand how they can share data from their papers. See <http://authorservices.taylorandfrancis.com/wp-content/uploads/2018/01/Understanding-our-basic-data-sharing-policy.pdf>.
- Finally, T&F finds folks have trouble making the most of their research after publication. We are working hard to help them make the most of tools available to them to ensure their paper has the post impact. See <https://authorservices.taylorandfrancis.com/ensuring-your-research-makes-an-impact/>.
- The next page offers a screen shot from the T&F website of a recent journal issue – a special edition on ecosystem services edited by Erika Washburn and Tiffany Smythe on behalf of The Coastal Society. See <https://www.tandfonline.com/toc/ucmg20/current>.
